

MS. HE FENG CHUN

Chairman and Chief Designer of Suzhou Institute of Landscape Architecture Design Co., LTD.

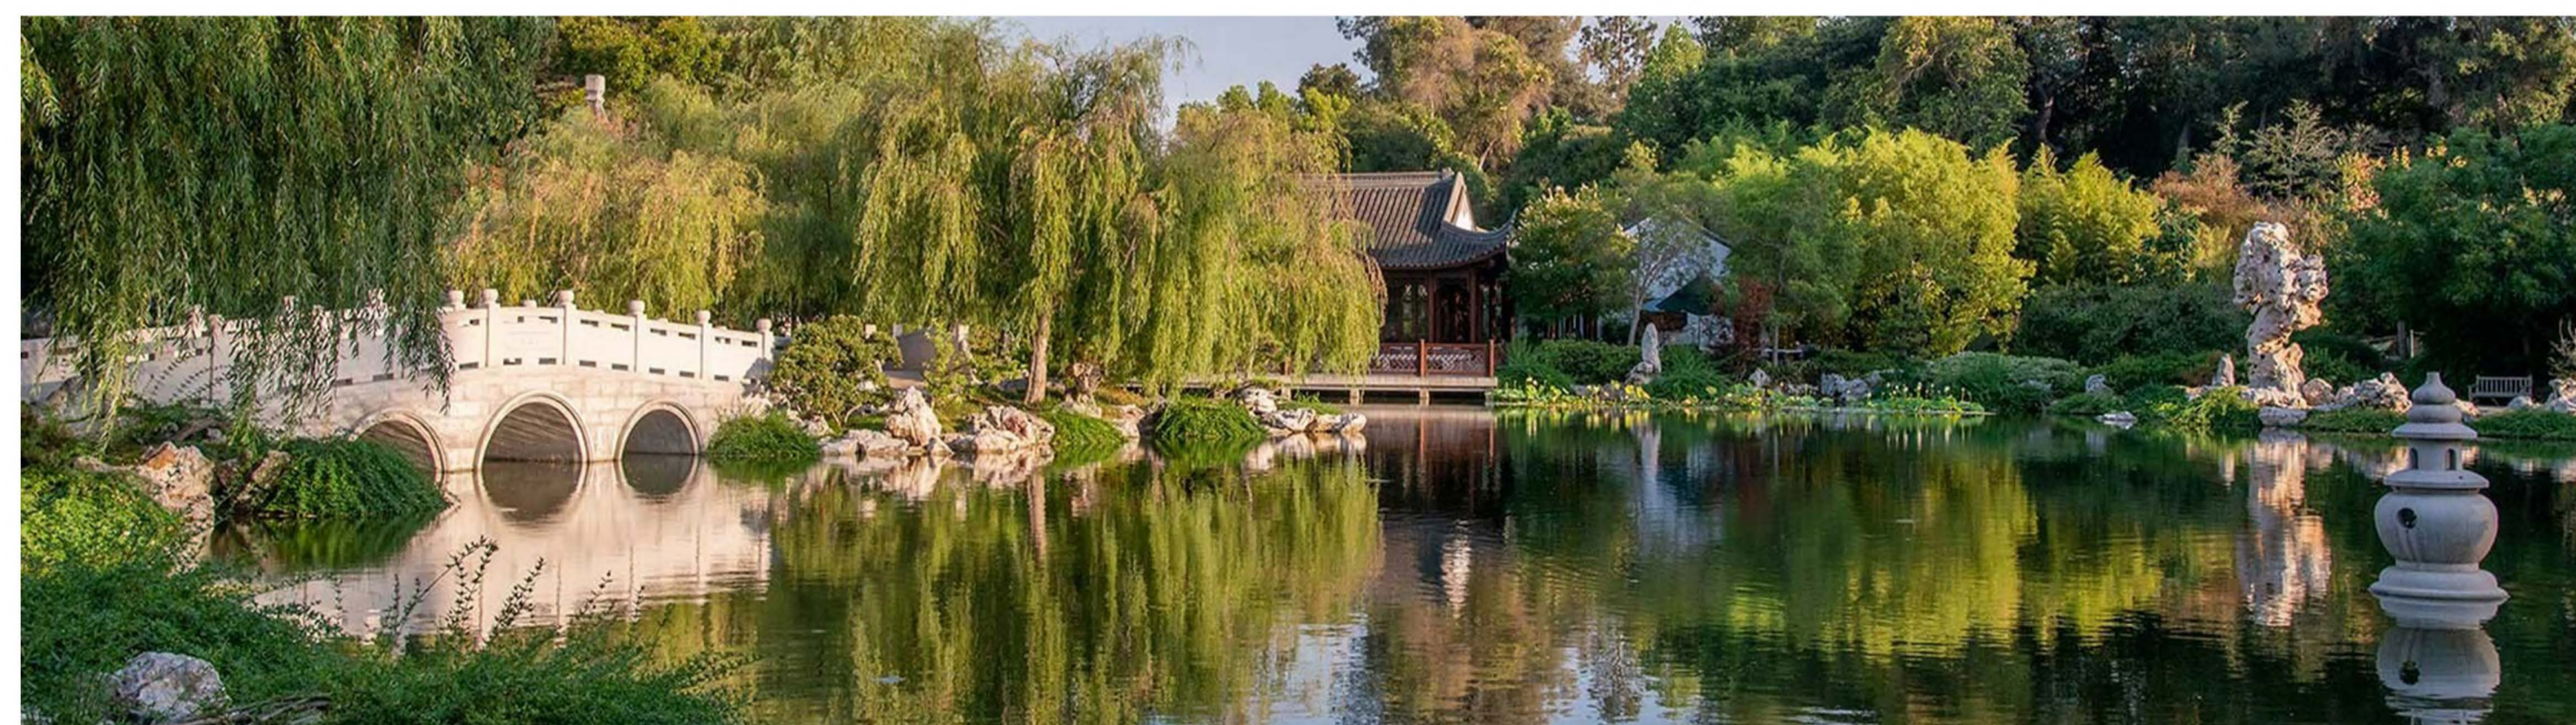

Inspired by the essence of classical Chinese garden, driven by the responsibility to promote excellent culture of Chinese classical gardens, and the mission of creating a new realm of Chinese modern landscape, He Fengchun's exploration into theories and practices of inheritance and innovation of Chinese gardens have been widely recognized by the community and leading professionals.

He Feng Chun, born in Yinchuan, Ningxia, graduated from Beijing Forestry University, is the chairman and chief designer of Suzhou Institute of Landscape Architecture Design Co., LTD. She was awarded the title of Jiangsu Provincial Master Architect by Jiangsu Provincial People's Government in 2016.

She also serves as vice president of Landscape Branch of China Engineering and Consulting Association (CEDA), and the Planning and Design Committee of Chinese Society of Landscape Architecture (CHSLA). She is currently a professor of Suzhou University of Science and Technology and a visiting professor at Southeast University.

She has presided over and participated in about 300 important projects, including restoration and renovation of Chinese classical gardens, planning and design of modern Chinese landscape, and export Chinese gardens overseas. She has won a number of domestic and foreign awards: 1 national Bronze Award of China Excellent Engineering Design Award, over 30 ministerial and provincial awards of first and second class, Gold and Bronze Awards of World Expo, the first and second Prize of National Excellent Science and Technology Progress Award, The United States Habitat Award and Special Contribution Award, the Asia Pacific Cultural Heritage Conservation Award and 2 IFLA-APR Awards.

Her designs and researches have been widely published in national and international Journals of landscape architecture and architecture. 5 academic monographs and a series of industry standards have published along with continuous practical projects during past three decades. Thus, He Fengchun has contributed to the development of Chinese landscape.
